

Unlimited Local and Long-Distance

Taxes, FCC and 911 fees not included

\$17.95 *
per month/per line

Record phone calls for minimum monthly fee

- Automatically record all phone conversations
- Download individual or multiple recordings for review and playback

Verizon Declares Copper is Dead:

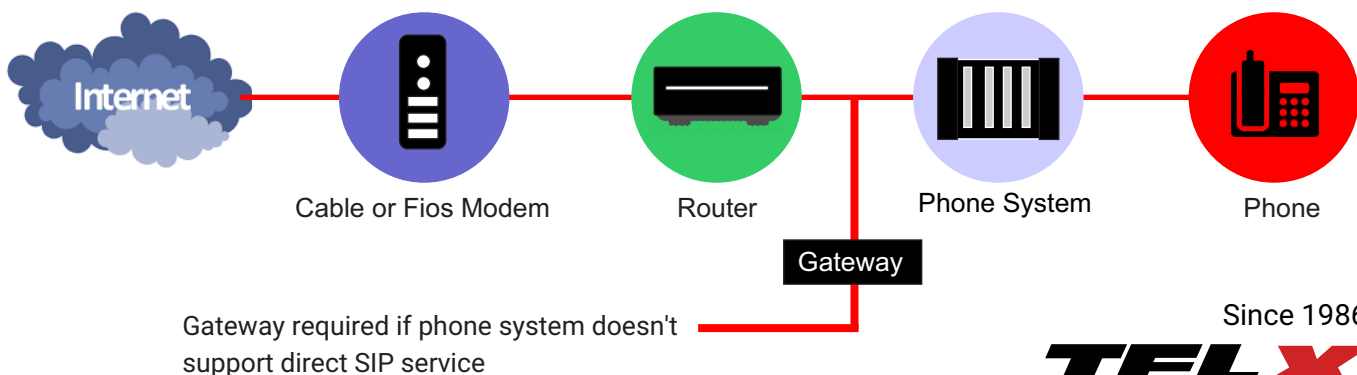

Traditional copper dialtone service is slowly fading away. In fact, Verizon announced they will no longer support copper service starting 2018. Your business will have four choices, FiOS, COMCAST, Cablevision and third-party SIP service. All four use your Internet connection for voice communication. We recommend SIP service provided by **Net2phone, the fourth largest carrier in the world.**

Why SIP Service is the **BEST** Choice...

- Savings of 30% or more
 - **No long term contract**
 - Robust network ensures crystal-clear calls
 - **Calls can be routed to a designated number during a service outage**
 - You can keep your phone number no matter where you move to geographically
 - **Caller ID displayed to the caller can show just your main number from any line**
- (You never have to worry about customers or patients capturing your private line phone number)*

HOW IT WORKS
